TRADITIONAL FEATURES IN A STYLISH METAL FRAME

Just as good as it looks

The FL 02 is a traditional mobile phone, in an extremely high-quality design. The target group of this device are those users who use the mobile phone to make phone calls, send SMS, or take photos, and at the same time they would like to have a device with elegant design and quality assembly, which is very well usable.

Separate buttons – easy handling

One of the main advantages of the Blaupunkt FL 02 is the extremely easy handling. The device is large-sized with delicate touch, and provided with metal-like push buttons, which makes it simple and fun to use the device. The buttons are placed in the old-fashioned way: the navigation key is found in the middle, and around it is the push-buttons. Thus, the use requires minimal attention, and the device can be easily handled with only one hand by children and adults as well.

Large-size, 2.8" colour display

Next to the keyboard is a contrasting, colour, QVGA display, which also helps the intuitive handling, and its 2.8" size ensures the excellent user experience. With the FL 02, you can take satisfying photos, which can also be excellently displayed with the screen.

Elegant design equipped with metal frame

The chassis of the FL 02 is made of a metal frame. This does not only optically increase the elegance of mobile phone, but also gives a quality feeling during the everyday use. Last but not least, it also guarantees the long-term durability of the device.
